**“Understanding the Heart Care Process”**

(Longmont, CO.) Longmont United Hospital will be hosting “Understanding the Heart Care Process” on Thursday, February 12 from 5:00 to 7:00 p.m. It will be a panel discussion featuring Fabio Pivetta, D.O. Family Practice, Thomas L. Matthew, M.D. Cardiothoracic Surgery, and Daniel White, M.D. Cardiology. Discussion on what preventative measures should you take to maintain a healthy heart, what are the signals for diagnosis, and when do you need to see a doctor will be discussed. Each doctor will also explain his or her role as a family physician, cardiologist, and cardiac surgeon - who do you, go to first? We encourage you to bring questions to these knowledgeable physicians.

**Health Screenings:** If you would like, screenings will be available for blood pressure, heart rate, and blood oxygen levels.

**Reduced-cost Lipid Panel:** The first 75 people to sign in at this seminar will receive a coupon for a full laboratory lipid panel at the reduced cost of \$25. This panel will analyze your cholesterol, triglycerides, and high-density lipoprotein (HDL). The results of your lipid panel will also calculate your cardiac risk index. Just what you need to make sure you have a healthy heart!

For more information, contact Program Registration at 303.485.4184.
